LANGUAGES

PROFESSIONAL SUMMARY

Passionate full-stack software developer with 5 years of experience building scalable web applications and microservices. Expertise in modern JavaScript frameworks, cloud architecture, and agile development practices. Proven track record of delivering high-quality solutions in both startup and enterprise environments, with a focus on clean code, user experience, and performance optimization.

PROFESSIONAL EXPERIENCE

Senior Software Developer

Stripe

2022 - Present

Lead development of payment processing microservices handling \$50B+ in annual transaction volume. Architect and implement scalable APIs using Node.js and PostgreSQL, serving 100K+ requests per minute. Collaborate with product teams to design and build new payment features for global markets. Mentor junior developers and conduct technical interviews for engineering candidates.

Software Developer

Medium

2020 - 2022

Developed and maintained content management systems and recommendation algorithms serving 100M+ monthly active users. Built responsive web interfaces using React and implemented real-time features with WebSocket connections. Optimized database queries and caching strategies, reducing page load times by 40%. Participated in on-call rotation and incident response procedures.

Junior Developer

TechFlow Solutions

2019 - 2020

Contributed to full-stack development of e-commerce platforms using React, Node.js, and MongoDB.
